

**In the Specification**

*Please replace the paragraph at page 6, lines 15-19 of the Specification with the following amended paragraph:*

FIG. 5 is a perspective view of a coupler for the post end of a leaching chamber. The coupler 30 also includes a swivel body 310, which slidably rotates under the chamber 10 (FIG. 1). The coupler 30, however, interconnects with the post interconnect 138 (FIG. 2A) on the top of the chamber. To accomplish that task, an elevated circular dome coupler ~~[[319]]~~ 339 is employed to mate with the chamber post interconnect.
